

Iwitanga Indicators

The Iwitanga indicators endeavour to recognise the importance of the work that goes into cultural identity and language revitalisation to whānau, hapū and Iwi identity. They are based on the following assumptions:

- That the numbers of people with knowledge and fluency in te reo rangatiratanga is an important outcome in its own right; and
- That the ultimate kaupapa language and culture regeneration is that it contributes to the vibrancy of the community, its' cultural creativity and the pride of people in their hapū and tribal identity

The tiers of indicators therefore endeavour to reflect:

The indicators are set out in four categories:

- **Mātauranga Indicators** - that endeavour to connect the work dedicated to cultural revitalisation to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future
- **Whakapapa Indicators** - that endeavour to connect the whakapapa infrastructure that many Iwi organisations use for recording tribal membership to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future
- **Te Reo Indicators** - that endeavour to connect the work dedicated to language revitalisation to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future
- **Tribal Connectedness Indicators** - that endeavour to connect the various efforts that go into fostering whānau members to actively connect/re-connect with the Iwi to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future

Mātauranga Indicators

The Mātauranga Indicators endeavour to connect the work dedicated to cultural revitalisation to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future.

scale	efficiency	enabling impact	hapū/whānau impact	tribal impact
Number of wānanga held on particular topics	Input cost per wānanga	Number of members attending wānanga and hui	Percentage of members who participate in mātauranga based collectives	Percentage of membership who report that cultural knowledge enhances their quality of life
Number of oral histories recorded	Input cost per oral history recorded			Percentage of membership who report satisfaction with access to cultural practitioners
Number of waiata recorded and disseminated	Input cost per waiata recorded	Number of groups formed/in existence to perpetuate mātauranga (eg weavers collectives, kapa haka)	Percentage of membership who believe they have acquired enough knowledge of mātauranga to teach their children	Reported level of confidence in cultural integrity of tribal knowledge and practices
Number of partnerships with schools and tertiary institutions to include mātauranga in curriculum	Input cost per curricula inclusion			Percentage of membership who report confidence in supporting hui and tangihanga
Number of publications funded/produced	Input cost per publication	Percentage of membership that report they know 'tribal anthems'	Percentage of marae that report satisfaction with access to cultural practitioners	Reported confidence in tribal identity being continued over generations
Number of whānau/collective hui funded/supported	Input cost per hui			Number of reported instances of intergenerational transfer of mātauranga

Whakapapa Indicators

The Whakapapa Indicators endeavour to connect the whakapapa infrastructure that many Iwi organisations use for recording tribal membership to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future:

scale	efficiency	enabling impact	hapū/whānau impact	tribal impact
Number of tribal registrations	Input cost per tribal registration	Percentage of reported confidence in tribal whakapapa information systems	Percentage of membership who believe they have acquired knowledge of whakapapa to teach their children	Percentage of membership who report knowledge of whakapapa enhances their identity
Number of whakapapa wānanga held/funded	Input cost per wānanga		Percentage of membership who report confidence in identifying relations	Percentage of membership who report satisfaction with access to whakapapa experts Percentage of tribal members engaged in intergenerational transfer of whakapapa knowledge

Te Reo Indicators

The Te Reo Indicators endeavour to connect the work dedicated to language revitalisation to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future:

scale	efficiency	enabling impact	hapū/whānau impact	tribal impact
Number of te reo resources produced	Input cost per resource	Number of members accessing te reo learning opportunities (disaggregated by source, age and gender)	Reported depth in kaikōrero and kaikaranga at marae (disaggregated)	Percentage of tribal members able to discuss mātauranga and kōrero tāwhito in te reo
Number of reo wānanga funded/held	Input cost per wānanga			Percentage of tribal members engaged in intergenerational language transmission
Number of partnerships with schools and tertiary institutions to include te reo in curriculum	Input cost per curricula inclusion	Percentage of membership with levels of te reo fluency (disaggregate by level, age and gender) \$ value of funding or other benefit obtained from the government (or other source)	Number of households speaking te reo in the home	Percentage of members who report knowledge of te reo enhances their identity
data source	data source	data source	data source	data source
Internal project management system	Internal accounts	Survey– possible questions in the survey tool section	Survey– possible questions in the survey tool section	Survey– possible questions in the survey tool section

Tribal Connectedness Indicators

The Tribal Connectedness Indicators endeavour to connect the various efforts that go into fostering whānau members to actively connect/re-connect with the Iwi to outcomes that benefit whānau and hapū, and the perpetuation of tribal identity into the future:

scale	efficiency	enabling impact	hapū/whānau impact	tribal impact
Number of tribal registrations	Input cost per completed tribal registration	Number of attendees at tribal events per 1,000 population	Percentage of membership who attend tribal events with whānau members	Percentage of membership who feel part of (valued within) the tribal community
Number of tribal events	Input cost per event	Number of tribal members known by name and sight	Percentage of membership who report satisfaction with tribal events increasing relationships with tribal members	Percentage of membership who feel pride in their Iwi/hapū
Number of tribal pānui	Input cost per publication/ panui		Percentage of tribal membership who report they have access to satisfactory cultural support	
			Percentage of membership of who feel valued within hapū community
